

DURA

Support™

GatherCraft™ Outdoor Furniture Collections featuring the DURASupport™ frame are quality designed for extra durability, support, and comfort. DURASupport frames are manufactured from the highest quality, Cast Aluminum, providing for a heavier, more durable furnishing that won't blow away with the first gust of wind. DURASupport frames are much stronger than those made from extruded, or hollow aluminum frames, supporting more weight and strenuous usage. DURASupport frames are also more resistant to rust and wetter, maritime climates.

DURASupport - Durability, support, and comfort wrapped in quality and elegance.
