

LED Umbrella

The GatherCraft 9' Led Umbrella is a wonderful addition to any underlit pool or patio location where it's difficult to get lighting. Equipped with long-lasting, solar-powered LEDs, 8 to 12 hours of light is available beneath the umbrella with a click of a switch.

Tested for durability, the umbrella fits standard umbrellas stands as well as dining and bistro sets. The pole may also be cantilevered to take advantage of the best shade from the sun.

Umbrellas available in Navy Blue, Gray, and Taupe.

"I love my LED Umbrella! It provides a quiet ambiance, and I was pleasantly surprised by the amount of light output it has. Highly recommended!"

- Chad R.
